PROFESSIONAL SUMMARY

Second-year IT student (Japanese-specialization) at DUT; trainee in the **20,000 Practical AI Talents Training Program (VinUniversity × Vingroup)** (Cohort 3). **Codeforces Expert (1731)**. Ships guarded LLM systems, on-premise document AI, and cloud/MLOps stacks. Seeking placement at **VinSpace**, **VinUni VRIC** (AI for VinMEC / GSM), and **VinSmart Future** (SmartCity, Super App, Enterprise AI). Japanese JLPT N4 (pursuing N3).

TECHNICAL SKILLS

Programming & DSA	C/C++ (competitive, advanced), Python, Java, C#, JavaScript/TypeScript, SQL, Lua, algorithms / optimization.
AI / ML / LLM	LLMs, Agentic AI (LangGraph, tool calling, multi-agent), RAG, Prompt Engineering, OCR/Document AI, CV, NLP, PyTorch, QLoRA, Ollama, Gemini, GGUF serving.
MLOps & Infra	Docker, Terraform, AWS/GCP, FastAPI, MLflow, DVC, GitHub Actions, llama.cpp (TTFT/P99), Lakehouse, Qdrant/pgvector/Chroma/FAISS, Feast, HA/DR.
Safety & Observability	Langfuse, LangSmith, RAGAS, PII redaction, prompt-injection guardrails, HITL, data governance, JSON logs, SLO/runbooks.
Full-stack & Data Languages	React, Next.js, Node.js/Express, PostgreSQL, Supabase (Auth, Realtime, RLS), Tailwind, SQLAlchemy, Alembic. English (Professional), Japanese (JLPT N4, pursuing N3).

EDUCATION

Danang University of Technology (DUT) — The University of Danang <i>B.E. in Information Technology (Japanese Specialization) · GPA 3.33/4.0</i>	<i>Danang, Vietnam</i> 2024 – 2029
- Earned honors admission to 3 top-tier tech universities (DUT, VNU-UET, VKU) and a seat on DUT’s official Informatics Olympiad / ICPC team. - Completing the 20,000 Practical AI Talents Training Program (VinUniversity × Vingroup) (Cohort 3, ID 2A202601655, Jul 2026 – Present), Track 2: AI Infrastructure: data pipelines, lakehouse, vector/feature store, model serving (llama.cpp, TTFT/P99), MLOps (MLflow, DVC), Terraform/AWS/GCP, Docker, CI/CD, monitoring, HA/DR, data governance.	

SELECTED PROJECTS

AgentLens — Multi-Agent Observability and RCA <i>VinAI Practical Talent Program · Team 083 · Full-stack / Agent Engineer</i>	<i>Live: agentlens.dpdns.org</i> 2026
- Shipped a live RCA platform for multi-agent systems, measured by 7 O(1) detectors (loops, bottlenecks, tool thrashing, token spikes) plus a 3-node LangGraph graph (Triage → Analyst → Verifier) with span-level evidence quotes. - Blocked hallucinated config diffs by requiring HITL approval and Layer-1 PII redaction on every proposal, implemented in FastAPI, Next.js, PostgreSQL 16 + pgvector, Docker Compose.	
VietIDP — On-premise Vietnamese Document AI (OCR + LLM) <i>Project Team Lead and Lead AI Developer · DUT Faculty of IT</i>	<i>github.com/Tienes2810/OCR-LLM-RESEARCH</i> 2025 – 2026
- Ranked Top 7 (Honorable Mention) at DUT Faculty Scientific Research Day 2026 by leading an on-premise pipeline: YOLOv8x stamp removal → EasyOCR + VietOCR → Qwen2.5-7B (Ollama 4-bit) structured JSON → Chroma RAG. - Kept 100% of documents on-machine (no cloud egress) by deploying FastAPI + React + Docker + CUDA with a local quantized LLM and a QLoRA extraction path.	
Japanese Learning Platform (PBL3) — Grade A <i>Project Lead and Full-stack Developer · github.com/Thainguyen2103/PBL3</i>	<i>kanjilearning.vercel.app</i> 2026
- Earned Grade A by shipping a production Japanese-learning web app (React 19, Supabase Realtime, Gemini coaching, Kanji graphs) with PvP matchmaking that eliminates lobby race conditions via PostgreSQL FOR UPDATE SKIP LOCKED. - Also earned Grade A on PBL2 and PBL1 by delivering a C/C++/SDL2 game-store desktop app and a TSP visualizer using Branch & Bound + DP-with-bitmask.	

EXPERIENCE

Google Student Ambassador <i>Official Ambassador — Central Vietnam representative</i>	<i>National / Danang</i> 2025 – Present
Selected as 1 of the Top 600 of 7,000+ nationwide applicants and named Top 200 Gemini Rising Star by publishing 10+ Gemini explainers and running AI workshops at Swinburne and DUT.	
Technical Communities and Mentoring <i>Creator, Administrator, and Olympiad Coach</i>	<i>Remote / Hue</i> 2020 – Present
Grew a science forum from 60K to 400,000+ members (2020–2021) by running content ops and 5+ online contests; reached 324,000+ Mini World map downloads (2020–2022) by shipping Lua gameplay systems as official platform critic; coach Hue olympiad teams in advanced C++ (2022–Present).	

COMPETITIVE PROGRAMMING, HONORS, AND SCHOLARSHIPS

- Reached **Codeforces Expert**, peak **1731**. ICPC Honorable Mention — National 2025, Southern 2025, Central 2024. Central AI Olympiad regional (Top 5 DUT). **Silver Medal**, DUT Code League 2025. VNOI Cup 2023 national finalist.
- High school: Honorable Mention, Central & Highlands Olympiad and National Youth Informatics (2023); Provincial Third Prize and Consolation (2022–2023).
- “**Thanh niên tiên tiến làm theo lời Bác**” cấp Trường năm 2026 (DUT). Stanford Machine Learning Specialization (Coursera). Google Career Certificates Scholarship (2026). Acecook Happy Scholarship (2024); Tuổi Trẻ “Tiep suc den trung” (2024); Hue Study Encouragement (2025).

Placement preferences: (1) VinSpace (2) VinUni VRIC — AI for VinMEC / GSM (3) VinSmart Future — SmartCity, Super App, Enterprise AI.
